EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The present application relates to apportioning bandwidth capacity dynamically to a plurality of satellite terminals in a communication switching system using both the provisioned and unprovisioned portions of the terminals, including the unique method steps of "receiving a bandwidth request message from one of the terminals, the one terminal being configured to submit the bandwidth request message that selectively requests capacity from the provisioned portion and the unprovisioned portion based upon a type of traffic received by the one terminal; allocating the provisioned portion of the capacity to the plurality of sub-pools of the terminals, the provisioned portion of the capacity being arranged into sub-partitions, wherein one of the sub-partitions is not associated with the sub-pools of terminals, and remaining sub-partitions are associated with the sub-pools of terminals; selectively allocating available capacity from the sub-partitions to one of the sub-pool terminals to permit overflow of traffic from the one sub-pool terminal, and selectively allocating the unprovisioned portion of the capacity to the pool to permit overflow of traffic from a terminal within the pool and to a terminal that is not a part of the pool of terminals." The closest prior art, Struhsaker (USP 6,434,129), discloses a wireless communication system that provides dynamic bandwidth allocation and quality of service using

alternate service pool and traffic channel pool partitioned from a set of 32 CDMA channels.

However, Struhsaker fails to anticipate or render obvious the above quoted limitations. This renders it allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
